

Name: Phillip Steeves
Student ID: V00975121
Email: phillipjws@uvic.ca
Course: SENG475
Section: T01

Assignment ID: cpp_project
Assignment Title: Project

Submission Source: https://github.com/uvic-seng475-2024-05/cpp_project-terminal_based_graphing_calculator.git
Commit ID: a618b69aa67f960584d9a64e2f46c3b50b3183f9

Results

=====

Package	Operation	Target	Status
orig	generate	---	OK (0.0s)
orig	configure	---	OK (0.7s)
orig	build	all	OK (12.5s)
orig	build	install	OK (0.2s)
orig	test	demo	FAIL (127 1.1s 2L)

Normally, an operation is indicated as having a status of either "OK" or "FAIL". A status of "?" indicates that the operation could not be performed for some reason (e.g., due to an earlier error or being a manual step). The time (in seconds) required for an operation is denoted by an expression consisting of a number followed by the letter "s" (e.g., "5.0s"). In the case of a test that consists of multiple test cases, the number of failed test cases and total number of test cases is expressed as a fraction (e.g., "10/50" means 10 test cases failed out of 50 test cases in total). The length (in lines) of the log file generated by an operation is denoted by an expression consisting of a number followed by the letter "L" (e.g., "10L"). To ascertain the reason for the failure of an operation, check the contents of the log file provided.

Legend

=====

```
Package: orig
  The code exactly as submitted by the student.
Build target: all
  Build the project.
Build target: install
  Install the project.
Test target: demo
  Run the demo program.
```
